GRAY SRIF-MGD-14BT-00 **\$1299**Go to MyServiceRifle.com for more details.

TROY honors the elite units of the Army and Air Force Special Operations and Navy Special Warfare Commands' Task Force Ranger with this historically accurate M16A2 Carbine. In the fall of 1993, Task Force Ranger embarked on a joint military raid into Mogadishu, Somalia. Operation Gothic Serpent rapidly devolved when two US Black Hawk helicopters were downed unexpectedly by Somali militia. The prolonged standoff of the deadly Battle of Mogadishu claimed the lives of 18 Americans, with 73 wounded and 1 captured. Continuing the My Service Rifle tradition, a portion of the sales on these exacting replicas will be used for military charities that support and honor our veterans and their families.

AIRBORNE

*Redi-Mag, SureFire and
Aimpoint not included

FOR THE RAIDERS, THE POWS,

Available now exclusively at [MyServiceRifle.com](https://www.MyServiceRifle.com)

The GAU-5/A/A is the United States Air Force version of the XM177E2 Commando Carbine. This firearm historically replicates the weapon used by The Son Tay Raiders in the largest rescue attempt of American POWs. 45 of the 56 Special Forces troopers were equipped with the GAU during the night raid on the Son Tay prison camp.

This limited edition, historically accurate GAU-5/A/A is done in partnership with The National League of POW/MIA Families, with portions of the proceeds to support their sole purpose: "to obtain the release of all prisoners, the fullest possible accounting for the missing and repatriation of all recoverable remains of those who died serving our nation during Vietnam".

COMMEMORATIVE EDITION

GRAY

SCAR-XM1-14YT-00

\$1199

The XM177E2 was developed in 1967 to suit the specific combat needs of the Military Assistance Command, Vietnam - Studies and Observations Group (MACV-SOG). MACV-SOG was a highly classified, multi-service, United States special operations unit which conducted covert operations. Their weapon, the XM177E2, became highly desired by Commando Forces for its compact size, fire power, high reliability and reduced signature.

Proceeds of each XM177E2 sold will go to support the charitable efforts of The Special Forces Association and the Special Operations Association as they, "commemorate fittingly the memory of those who have given their lives in defense of the Free World" through financial support and assistance to SFA and SOA members and families through scholarships and emergency relief."

WITH CHARITABLE DONATIONS GOING
TO SPECIAL FORCES ASSOCIATION
AND SPECIAL OPERATIONS ASSOCIATION.

The TROY family of Pump Action Rifles include the popular hunting calibers of .338 Fed and .243 Win. An exclusive Mossy Oak® Edition in .338 Fed is now available in "Shadow Grass Blades" pattern. The TROY Pump Action Rifle embodies innovation of the traditional design to make this AR-style rifle compliant in even the most restrictive states. This lightweight, easily maneuverable rifle uses many standard accessories.

TROY PUMP HANDLE UPGRADE

All TROY Pump Action Rifles now sport a new, ergonomic pump grip. Smaller and easier to grip than the legacy handle, it is constructed of nylon with glass fill for added strength and in-field durability. This all new design includes a handstop to prevent slipping during rapid cycling and provides added safety in wet weather conditions. PATENT PENDING.

Engineered from the magazine up, the TROY M5 9mm offers a sharp, clean profile and utilizes the globally popular GLOCK® mag. Specifically designed to the GLOCK's angle, the upper receiver has been engineered to prevent magazine over insertion and the lower provides dependable feeding and extraction without the use of an adaptor.

The TROY M5 9mm features the new TROY SOCC Airborne® stock with standard buffer tube; can quickly be deployed and provides a longer length of pull when fully extended. **The TROY M5 is also available with the popular M4-style 6 position stock in 2018.** The M5 is fully functional, even with the stock collapsed or open, resulting in faster selector switch controllability, accesability, and safety.
