DOUBLE-TAP®
BREACHING TOOLS

*"Spreading the Promise of
Freedom One Door at a Time"*

We focus on quality not quantity

The highest quality of US made materials and equipment are used in the construction. Each tool is machined from billets of the appropriate metal to exacting standards. This ensures that the end product is as strong as possible and makes them the most reliable breaching tools available today.

“No one else can begin their job until the breacher completes his first.”

Why are our tools special?

Double-Tap Technology...

Double-Tap Breaching Tools® are a true revolution in tactical breaching tool technology. They use an advanced locking device that adds strength and ease of operation to enhance operator speed and comfort. These are the only tools on the market with an internal anti-blowback device.

The "Floating Mass" adds impact forces to reduce bounce back and vibration, common with other hammers, and transfers more energy into the target.

FRIES/SPIES Pole

Our Products

Hammers (light, heavy, intermediate, standard)

Halligans (standard, military)

Tool Sets (standard, quick change)

Rams (light, heavy)

Tool Carriers (single, double)

Breaching Doors (exothermic, free standing)
