ACS™
ADAPTIVE CARBINE/STORAGE STOCK

A streamlined, anti-snag profile shields the release latch to prevent accidental activation. Similar to the Magpul CTR®, the ACS also features a supplemental friction lock system that minimizes excessive stock movement for enhanced weapon stability and accuracy. Dual, rear accessible, water-resistant battery storage tubes and an integral storage compartment in the butt of the stock provides multiple storage options. The ACS comes standard with a 0.30" thick rubber butt-pad which provides positive shoulder purchase to prevent slippage even with body armor or modular gear.

- Drop-in replacement for the standard M4 stock
- Two battery storage tubes and a storage bay
- Friction locking mechanism to minimize excess moment
- Shielded operation lever
- Reinforced polymer construction
- Enhanced strength and ergonomics
- Improved cheek weld
- Rubber buttpad
