ASAP®

AMBIDEXTROUS SLING ATTACHMENT POINT

The ASAP Ambidextrous Sling Attachment Point allows a range of motion greater than 180 degrees, enabling true ambidextrous weapon manipulation for both left and right handed shooters. The ASAP replaces the standard AR15/M16 carbine stock receiver end plate, providing a tactical advantage by minimizing snagging and facilitating easy transition to and from weapon and reaction side shoulders. The ASAP works with Single-Point® type slings with snap hook style attachments such as the Magpul MS2 Sling.

Made from precision cast black manganese phosphatized steel, the ASAP is compatible with both mil-spec and commercial-spec carbine receiver extensions (buffer tubes). The ASAP has been proven to withstand stress tests of over 300lbs.

- Solid cast steel plate
- Durable welded link ring
- Mil-spec black manganese phosphate finish
- Works with both mil-spec and commercial-spec carbine receiver extensions
