# TFO®

## THE ORIGINAL TRITIUM + FIBER-OPTIC HANDGUN SIGHTS

The better you can see your sights, the better you can shoot. We brought fiber-optics to the shooting sports industry decades ago for this very reason. TFO® pairs our fiber-optic sights with our tritium night sights to create a consistently bright sight picture — day or night! Our patented combination of tritium and fiber-optic technologies unites the best of both worlds — providing the same bright sight picture whether you are in glaring daylight or complete darkness.

**YELLOW FIBER REAR SIGHT MODELS**

Also available: Yellow fibers in the rear sight increase contrast and aid in quickly focusing on the brighter green front sight. (See page 51 for model listing).

- The first handgun sight of its kind – combining tritium and fiber-optic illumination
- Unmatched visibility in all shooting conditions 24/7
- Assembled in USA with quality Swiss tritium for maximum brightness
- Glows in the dark – no batteries or light exposure required
- Concealed fiber cannot be seen by target
- Available with green or yellow rear sights
- FORTRESS FINISH™ nitride protective coating
- Snag-resistant design / fits standard holsters
- Fits most standard holsters
